

# Bravo!

Early Childhood Curriculum®

A sneak peak at how learning looks at Doodle Bugs!

If our curriculum theme is Healthy Habits, you will see:

.....  
 “Deep meaning lies often  
 in childish play.”

– Johann Friedrich von Schiller

.....

1+2=3 Math

### Cereal Sort

Using manipulatives to reinforce math concepts enhances children's understanding. A simple cereal sorting activity encourages experimentation with counting, arithmetic and basic fractions.

Science

### Cooking

Children learn best through hands-on investigation and observation. As they mix, pour, measure, and bake, students gain a practical understanding of important early science concepts.

Reading

### Food Pyramid

Language and literacy develop naturally when teachers introduce new vocabulary, phonics concepts and comprehension skills with fun, interactive learning experiences.

Gross  
Motor Skills

### Tae Kwon Do

Daily exercise makes fitness fun! Enrichment activities like Tae Kwon Do are designed to promote coordination, balance and other important physical skills.

Dramatic  
Play

### Doctor's Office

Dramatic play complements curriculum themes to promote language development and social skills. Realistic props pique the interest of young learners.

Fine  
Motor Skills

### Playdough

The 'Handwriting Without Tears' curriculum encourages children to use various mediums to experiment with shapes, lines and letters. Playdough and chalk are favorite ways to build the fine motor skills that are necessary for writing.
